ABSTRACT

Described are novel equilenin derivatives of general formula I

$$R_2$$
 R_5 CH_2 R_4 R_4 R_4 R_5 R_7 R_7 R_8 R_8 R_1 R_9 R_9 R_9 R_9 R_9

methods for producing the same and medicaments containing these compounds.

The new compounds have antioxidative activity and are usable for geroprophylaxis in women and men.
